TASK 4

DEPLOY A DOCKER CONTAINER ON CLOUD VM

Goal

Deploy a Docker-based web application on a cloud virtual machine.

Requirements

- Install Docker on VM
- Run container using image (nginx / node app)
- Expose container port to internet

Deliverables

1. Public link / IP showing container output
2. Screenshot + Docker command list

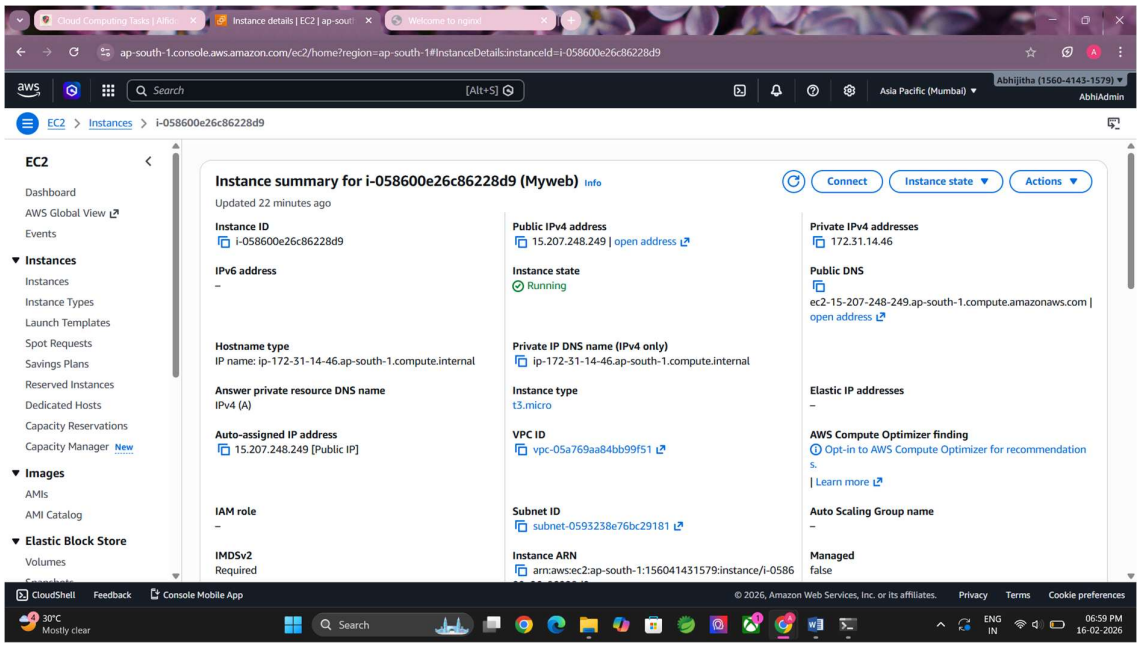
1. Public link / IP showing container output :

http://15.207.248.249/

2 . Screenshot + Docker command list :

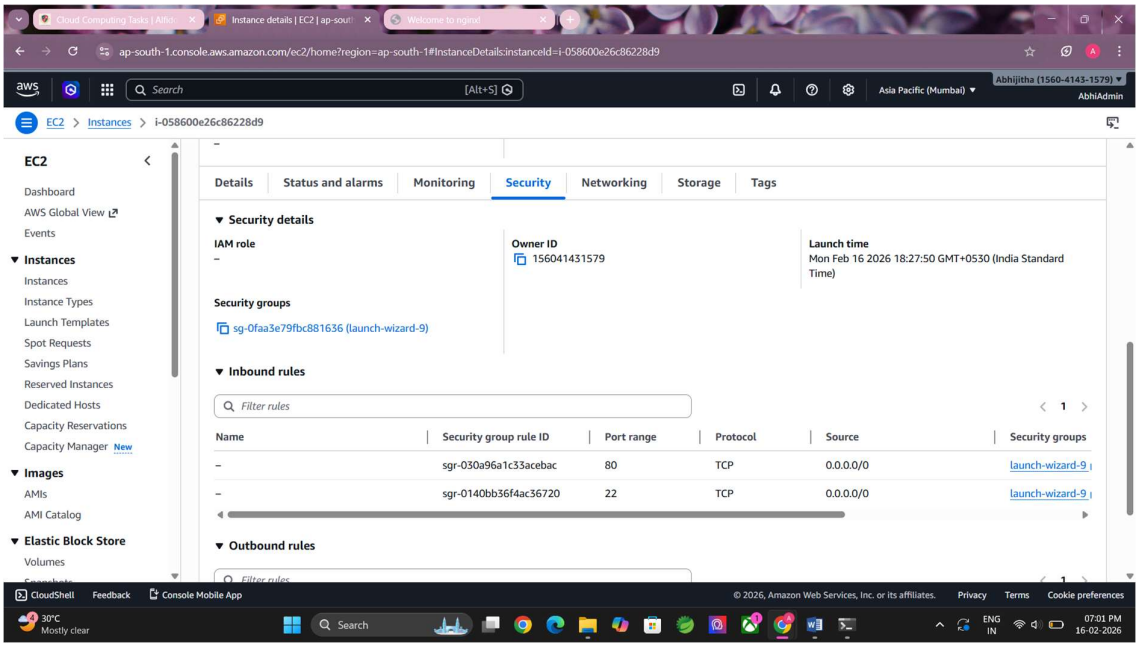
Screenshot 1 – EC2 Instance Page :

- Instance state: Running
- Public IP visible



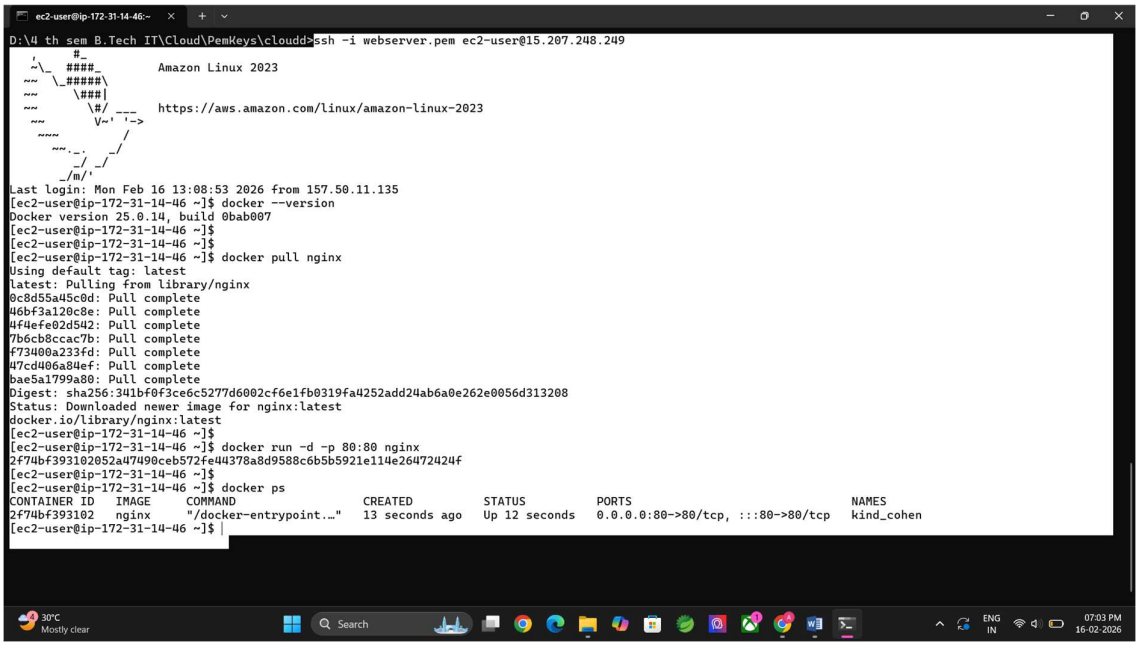
Screenshot 2 – Security Group :

- Inbound rules
- Port 80 open (HTTP)
- Port 22 open (SSH)

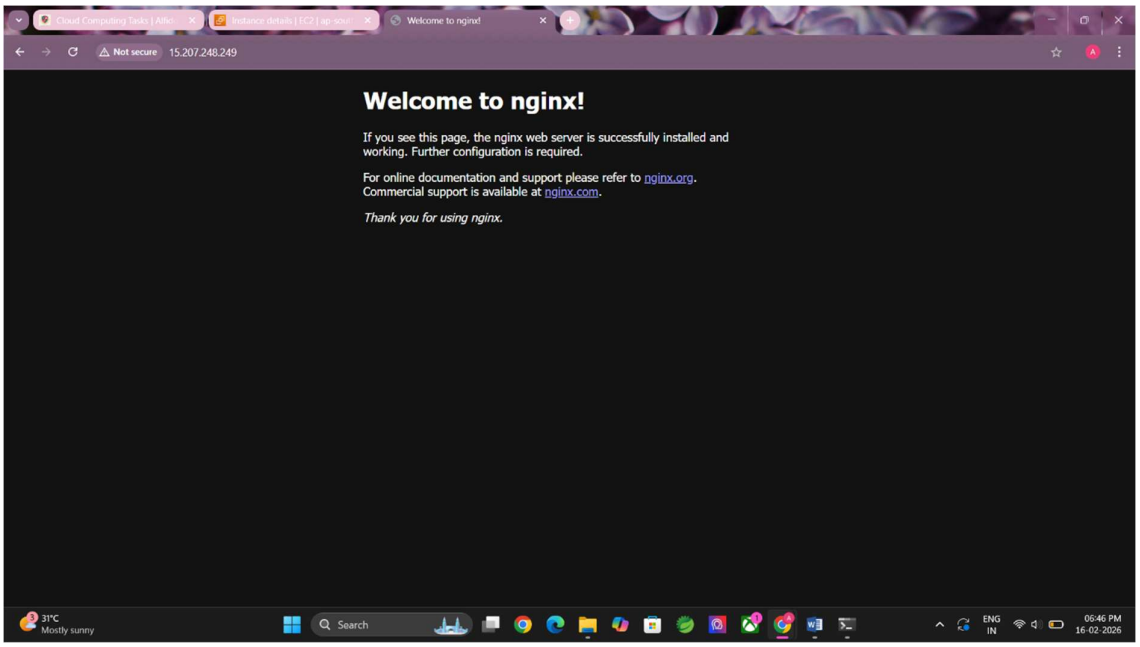


Screenshot 3 – Terminal Commands :

docker --version
docker pull nginx
docker run -d -p 80:80 nginx
docker ps



Screenshot 4 : Browser page showing nginx welcome page with IP visible :



Docker command list :

sudo yum update -y
sudo yum install docker -y
sudo service docker start
sudo systemctl enable docker
sudo usermod -aG docker ec2-user
docker --version
docker pull nginx
docker run -d -p 80:80 nginx
docker ps
